Clay Animation

Clay & animation – What a perfect combination!

Students will participate in the planning, producing, and screening of their own clay animation movies for a **COMPUTER EXPLORERS® Movie Premier**. Working in teams, students do it all, from story creation to making characters and sets. The course will consist of the movie planning, creation of clay characters and producing the stop motion animation images. Children will combine all planning and creative elements as the movie is compiled and completed for viewing.

Fun, learning & excitement go hand-in-hand in this special class.
