

Cranford Recreation Presents

Join us to build and fly real model planes and to explore the world of aviation!

Through this fun gateway of craftsmanship and hobbies our students will take home skills that last a lifetime!

Every semester aviators build from scratch, fly, and take home 3 different models of airplanes.

Each aviator learns to read plans, use metric rulers, make necessary calculations, and work with different hobby tools. Aviators will be educated with actual FAA certified materials.

- All materials, wood, supplies and tools are provided at no additional cost
- The aviation club is also available for birthday parties

Grades: K - 5

Day: Thursdays

Dates: January 26 - March 29
